Section 1194.21 Software Applications and Operating Systems - Detail
Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Fully Supported	FarPoint Spread fully supports Microsoft Windows® accessibility features including StickyKeys, FilterKeys, MouseKeys, High Contrast and more. Keyboard access is provided throughout Spread. Keyboard action mapping is also supported. Spread Help functionality includes easily accessible reference guides for keyboard accessibility.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Fully Supported	FarPoint Spread does not disrupt or disable any accessibility features of the operating system.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Fully Supported	FarPoint Spread supports technologies that make computer programs more accessible to people who use assistive technology. Cells with focus are shown with a focus rectangle drawn around them. Spread supports a FocusIndicatorRenderer interface that allows the application developer to create their own cell focus indicator to aid with accessibility.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Fully Supported	FarPoint Spread user interface elements include check boxes and buttons, to name a few.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an	Fully Supported	FarPoint Spread utilizes standard and consistent images.

Criteria	Supporting Features	Remarks and explanations
application's performance.		
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Fully Supported	FarPoint Spread displays error message information from the operating system and displays help system pages from the underlying .NET framework.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Fully Supported	FarPoint Spread supports system-wide color settings as identified in the operating system display properties.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Fully Supported	FarPoint Spread does not include animated objects.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Fully Supported	FarPoint Spread does not use color to convey information or indicate actions. Selection and focus indication are not tied to color, though color customization can be used.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Fully Supported	FarPoint Spread supports the selection of colors for producing contrast levels.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Fully Supported	FarPoint Spread does not use flashing or blinking objects or text in any application user interface.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	FarPoint Spread does not use electronic form templates.

Section 1194.22 Web-based Internet Information and Applications - Detail
Voluntary Product Accessibility Template

Note: FarPoint Spread is not a Web-based internet information and applications product. Spread does however support saving to XML format.

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(g) Row and column headers shall be identified for data tables.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2Hz and lower than 55Hz.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.

Criteria	Supporting Features	Remarks and explanations
(k) A text-only page, with equivalent information or functionality, shall be provided to make a Web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(m) When a Web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	FarPoint Spread for Windows Forms does not have a Web component.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

Section 1194.31 Functional Performance Criteria - Detail
Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
<p>(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.</p>	<p>Supported (with minor exceptions)</p>	<p>FarPoint Spread supports technologies that make computer programs more accessible to people who use assistive technology. FarPoint Spread supports the use of screen readers to access user interface information.</p> <p>Commonly used assistive technologies may be used with these products. Users of assistive technology should contact their assistive technology vendor to assess the compatibility of specific assistive technology with FarPoint Spread products.</p> <p>Formatting-type smart tags are activated by a user hovering over text using a keyboard or mouse. The hover action enables screen readers to use the smart tag shortcut (Alt+Shift+F10) to open the smart tag menu. The menu that appears is accessible through the keyboard.</p>
<p>(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.</p>	<p>Supported (with minor exceptions)</p>	<p>FarPoint Spread supports the use of screen readers to access user interface information.</p> <p>Spread, with few exceptions, also supports system large font settings.</p> <p>Minor exceptions noted in sections 1194.21 and 1194.22.</p> <p>Users of Microsoft Windows operating systems can access Magnifier in the Accessibility Options. An assistive aid may also be used.</p>

Criteria	Supporting Features	Remarks and explanations
<p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided</p>	<p>Not Applicable</p>	<p>FarPoint Spread does not require user hearing for access to component functionality. FarPoint Spread does not provides audio cues.</p>
<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p>	<p>Not Applicable</p>	<p>FarPoint Spread does not require user hearing for access to component functionality. FarPoint Spread does not provides audio cues.</p>
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Not Applicable</p>	<p>FarPoint Spread products do not require speech recognition.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Fully Supported</p>	<p>FarPoint Spread products support operating system tools such as StickyKeys and FilterKeys as well as other assistive technologies.</p> <p>FarPoint Spread provides the capability for users to use tab, or short-cut keys for many, but not all features.</p> <p>When the StickyKeys feature is on, the user can press a modifier key (SHIFT, CTRL, or ALT) and then another key in sequence rather than at the same time, to enter shifted (modified) characters and other key combinations. Pressing a modifier key once <i>latches</i> the key down until the user presses a non-modifier key or clicks a mouse button. Pressing a modifier key twice <i>locks</i> the key until the user presses the key a third time.</p> <p>The FilterKeys accessibility feature allows the user to set the keyboard repeat rate, acceptance delay and bounce rate.</p>

Section 1194.41 Information, Documentation, and Support - Detail
Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supported	Product documentation can be made available in alternate format for customers on the Web and available for no additional charge. FarPoint Spread includes extensive Help file documentation available both integrated with the development environment and separately as a compiled help file. Documentation is also available in printable form in PDF files.
(b) Accessibility and Compatibility Features End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Information on the accessibility and compatibility features of FarPoint Spread products is available either by phone or by digital form for viewing on the Web or for printing in PDF form at no additional charge.
(c) Support Services Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported (with exceptions)	FarPoint Technologies Technical Support team is available for phone or Web communication. FarPoint does not have a TTY phone but can handle calls through Telecommunications Relay Service (TRS) operators.
