FarPoint Technologies Announces Spread for SharePoint v2

SharePoint Spreadsheet Web Part with full binding support for SQL Server and SharePoint Lists

MORRISVILLE, NC — June 24, 2009 – FarPoint Technologies has announced the release of Spread for SharePoint, version 2. Spread for SharePoint is a Microsoft® Windows SharePoint® Server v3 (WSS3.0) integrated spreadsheet Web Part. Spread for SharePoint allows SharePoint site owners to provide complete data binding to SQL Server Tables and Views and to SharePoint Lists. In addition to the exceptional binding functionality, the web part provides users with a rich user experience and basic data analysis functionality through the use of the built-in features: multiple-level filtering and conditional formatting.

Spread for SharePoint provides functionality to auto-generate editable SQL Server commands to allow the site owner the opportunity to customize the SQL Create, Update, and Delete (CRUD) Commands.

Spread for SharePoint presents SharePoint List data in a dynamic spreadsheet that is integrated with SharePoint List View customizations including column visible, column order, sort, filter, group by and totals.

For both SQL Server and SharePoint List binding, users are provided with a complete data-binding experience where the data is not only read from the binding source, but changes are written back to the binding source as well.

Spread for SharePoint includes functionality to export the data view displayed in the web part to multiple document types: PDF, Excel 97-2003(XLS), or Excel 2007(XLSX).

To further extend Spread for SharePoint, SharePoint developers can create custom SharePoint Spreadsheet Web Parts by extending the unsealed base class of Spread for SharePoint.

“We recognize that SharePoint professionals need rich tools to effectively manage data from within their SharePoint sites,” said FarPoint CEO Rick Williamson, “so we have leveraged our expertise in spreadsheet technologies to produce a spreadsheet component for SharePoint to address these needs.”

Availability

FarPoint Spread for SharePoint is available directly from FarPoint Technologies at (800) 645-5913 or (919) 460-4551. Spread for SharePoint has a suggested retail price of \$1495.

About FarPoint Technologies
