**For Immediate Release**  
**March 24, 2004**

### **FarPoint Technologies Announces *clubFarPoint*** *The ultimate, fun, online support destination for professional developers*

**MORRISVILLE, NC — March 24, 2004** — FarPoint Technologies, Inc., the leading developer of professional components for Microsoft® Visual Studio® .NET and Visual Studio® 6 development, today announced the ultimate online support and resource site for professional developers – **[www.clubfarpoint.com](http://www.clubfarpoint.com)**.

*clubFarPoint* allows FarPoint to expand on the quality support our customers currently receive, as well as allow fellow developers to share their skills with others about all programming issues. Members can visit the site to view and submit articles, ask questions, search for answers, stay current with the latest industry news, as well as many other features. As an incentive to actively participate, all contributing members will earn *farPoints* that can be redeemed for some great prizes.

“Support and product knowledge sites don’t have to be dull”, said Donald Williamson, product manager for *clubFarPoint*. “Our goal was to create a place where our customers and other developers can come together in a relaxed, fun environment to ask questions and share their knowledge with other developers. While still in its infancy, we hope *clubFarPoint* will soon evolve as the ultimate destination for all developers.”

Please visit [www.clubfarpoint.com](http://www.clubfarpoint.com) to begin your adventure. Membership is free!

### **About FarPoint Technologies**
